The SAFE high speed debris removal solution

Gator Getter™ was designed to be used as fast speed highway debris removal equipment. This equipment works by scooping up debris as you are driving down the road. At regular speeds, it will push the item up and around the barrel to a collection tray which will hold it until emptied. The most important virtue will be the safety significance of not having personnel in the road to remove debris in a traffic stream, no road shut downs, no traffic slow downs.

Mounts to a standard 30 1/2" snowplow hitch for a highway truck

Gator Model 4872

48" Deep x 72" Wide

(Overall Width 86")

Weight 1,165 lbs.
